

Study Space Legal Package

06 Contributor Standards Manual

STUDY SPACE

Contributor Standards Manual

Technical, security, testing, and collaboration standards

Field	Details
Version	0.1
Draft date	2026-07-14
Prepared for	Founder review and qualified attorney review
Status	Attorney-review draft only; not final legal advice; not ready for signature until reviewed and approved by qualified counsel.

Important Notice

This draft package is a project-specific working draft prepared for review, amendment, and approval by qualified legal counsel. It is not legal advice, does not create an attorney-client relationship, and should not be signed or relied upon until counsel confirms suitability for the governing law, facts, parties, and commercial plan.

Revision History

Version	Date	Description	Author
0.1	2026-07-14	Initial project-specific attorney-review draft generated from inspected Study Space repository and founder instructions.	Drafting assistant

Table of Contents

This Table of Contents is a placeholder. In Microsoft Word, select this paragraph, insert an automatic table of contents, or update fields after legal review.

1. Definitions and Interpretation
2. Main Terms
3. Project-Specific Provisions
4. Schedules and Appendices
5. Signature Pages
6. Legal Review Notes

1. Definitions and Interpretation

1.1 "Agreement" means the applicable Study Space legal document in which this definition appears, including its schedules and appendices.

1.2 "Founder" means the individual identified as founder, owner, project lead, lead architect, final decision maker, commercial decision maker, and repository administrator for Study Space unless a later signed written agreement states otherwise.

1.3 "Contributor" means a trusted volunteer collaborator granted access to the Study Space repository or confidential project materials to contribute code, documentation, design, testing, planning, research, or related work.

1.4 "Project" means Study Space, including all current and future software, source code, documentation, designs, databases, configurations, architecture, services, APIs, plugins, applications, websites, brands, roadmaps, and related materials.

1.5 "Repository" means any Git repository, issue tracker, package registry, deployment console, documentation workspace, or related development system used for Study Space.

1.6 "Project Materials" means all code, documentation, designs, architecture diagrams, database schemas, templates, prompts, roadmaps, tests, configuration files, deployment scripts, and related work product created for or supplied to Study Space.

1.7 "Confidential Information" means non-public information concerning Study Space, including source code, architecture, credentials, security posture, user information, business plans, roadmaps, financial information, founder strategy, and contributor discussions.

1.8 "Pre-Existing IP" means technology, tools, libraries, snippets, templates, workflows, inventions, know-how, or other intellectual property owned or controlled by a party before contribution to Study Space or independently developed outside the Project.

1.9 "Open Source Software" means third-party software distributed under a license permitting use, copying, modification, or redistribution under stated conditions, including permissive, copyleft, source-available, and public-domain-equivalent materials.

1.10 "Personal Data" means information relating to an identified or identifiable person, including user account data, profile data, study records, messages, logs, identifiers, and authentication-related metadata.

1.11 Headings are for convenience and do not affect interpretation.

1.12 References to the Project include future versions, modules, integrations, deployment environments, mobile applications, desktop applications, APIs, plugin systems, and successor products.

1.13 A reference to writing includes a signed electronic agreement, repository policy acknowledged in writing, or other legally recognized electronic record approved by the Founder and counsel.

1.14 If there is a conflict between this document and mandatory law, mandatory law controls, and the affected clause should be narrowed rather than invalidating the entire document.

2. Standards

1. Architecture

1.1 Use existing Flask blueprint/service/model structure.

1.2 Keep business logic out of templates where practical.

1.3 Use migrations for schema changes; do not rely on `db.create_all` in normal startup.

2. Code Quality

2.1 Prefer clear modular code over clever abstractions.

2.2 Avoid duplicate logic.

2.3 Preserve user ownership checks and privacy defaults.

2.4 Document complex decisions.

3. Security

- 3.1 Use CSRF hidden inputs for forms.
- 3.2 Hash tokens and passwords.
- 3.3 Never log raw passwords or secrets.
- 3.4 Validate uploads by content and MIME.
- 3.5 Respect PDF allowlists and CSP.

4. Testing

- 4.1 Run compile checks, unittest discovery, route smoke tests, and migration current checks after changes.
- 4.2 Add tests for auth, ownership, write flows, migrations, and security-sensitive behavior.
- 4.3 Do not mark a feature complete without verification.

5. Git and Reviews

- 5.1 Use descriptive commits and pull requests.
- 5.2 State risk, tests, migrations, and rollback notes.
- 5.3 Do not merge your own high-risk security changes without review.

6. Documentation

- 6.1 Update README, SECURITY, .env.example, and user-facing docs when behavior changes.
- 6.2 Document new environment variables and deployment requirements.

Schedule 1 - Project Snapshot

Topic	Observed Study Space Detail
Project	Study Space
Founder	[Founder Legal Name]
Current owner statement	The Founder is the intended project owner, repository administrator, lead architect, final decision maker, and commercial decision maker unless changed by a signed written agreement.
Repository	Local project at C:\Users\ewanb\OneDrive\Desktop\All MY SH!T\Study Room; current Git remote observed as https://github.com/Deadking1i1/Flower-world.git .
Stack	Python Flask application with Jinja templates, SQLAlchemy models, Flask-Migrate/Alembic migrations, SQLite for local development, PostgreSQL-compatible configuration path, Waitress/Procfile deployment path, Redis-compatible rate-limit storage.
Features	User accounts, profiles, settings, notes, tasks, events, study sessions, flashcards, groups, feed, notifications, assistant summarization, PDF embedding with domain allowlist, SMTP-ready email verification/reset/change flows, security event logging, account export and deletion.
Documentation	README.md, SECURITY.md, .env.example, tests, migrations, and modular route/model/service files are present. No standalone LICENSE file was observed.
Validation	At inspection, tests passed and migration head was f7a9b1c3d5e6.

Schedule 2 - Current Technical Modules

Module	Observed Status
Authentication	Registration, login, logout, password change, password reset, email verification, email change, security events.
Dashboard/Hub	Dashboard summaries, study hub, quick notes, events, PDF embedding by allowlist, placeholder Spotify connection.
Notes/Tasks	Notes hub, notes, task planner, state transitions, pagination, ownership checks.
Study Tools	Timer, study sessions, flashcards, assistant summarization.
Community	Groups, feed, posts/comments model, public notes/flashcards.
Account/Privacy	Profile, settings, export, deletion, security history, normalized UserProfile/UserSettings.

Signature Pages

The parties should not sign this draft until qualified legal counsel has reviewed and approved it.
